## Contents

---

**1. Title: Kirk's Fixed Point Theorem in Generating Spaces of Semi-Norm Family**

**Authors: G. Rano, T. Bag and S.K. Samanta**

**PP. 1-13**

**2. Title: A Geometric Model for Differential K-Homology**

**Authors: A. Elmrabty and M. Maghfoul**

**PP. 14-36**

**3. Title: Algebras Generated by Invertible Elements**

**Authors: E. Ansari-Piri, S. Nouri and R.G. Sanati**

**PP. 37-41**

**4. Title: Minimality and Maximality of Ordered Quasi-Ideals in Ordered Ternary Semigroups**

**Authors: P. Jailoka and A. Iampan**

**PP. 42-58**

**5. Title: On the Solution of Rough Goal Bi-Level Multi-Objective Linear Programming Problem**

**Authors: T.I. Sultan, O.E. Emam and N.F. Rizkalla**

**PP. 59-74**

**6. Title: Soft Graphs**

**Authors: R.K. Thumbakara and B. George**

**PP. 75-86**

**7. Title: Common Fixed Point Theorem on Compatible Mappings of Type (P)**

**Authors: V. Srinivas and V.N. Raju**

**PP. 87-94**

**8. Title: Best One-Sided Approximation of Entire Functions in  $L_{p,w}$  Spaces**

**Authors: S.K. Jassim and Alaa A. Auad**

**PP. 95-103**

(Continued)

**Contents**

---

**9. Title: Monte Carlo Simulation for Interpreting Improved Time Points of a Given Point Process Using Conditional Intensity Function**

**Authors: B. Fathi-Vajargah and H. Khoshkar-Foshtomi**

**PP. 104-113**

**10. Title: Some Common Fixed Point Theorems on  $G$ -Metric Space**

**Authors: Giniswamy and P.G. Maheshwari**

**PP. 114-124**

**11. Title: Spatial and Descriptive Isometries in Proximity Spaces**

**Authors: J.F. Peters, E. İnan and M.A. Öztürk**

**PP. 125-134**
