

THEORY AND APPLICATIONS OF CATEGORIES

Volume 18, 2007

Bicat is not triequivalent to Gray Stephen Lack	1
Polarized category theory, modules, and game semantics J.R.B. Cockett and R.A.G. Seely	4
Functional analysis on normed spaces: the Banach space comparison M. Sioen and S. Verwulgen	102
On Yetter's Invariant and an Extension of the Dijkgraaf-Witten Invariant to Categorical Groups Joao Faria Martins and Timothy Porter	118
Pullback and finite coproduct preserving functors between categories of permutation representations: Corrigendum and Addendum Elango Panchadcharam and Ross Street	151
CCD lattices in presheaf categories G. S. H. Cruttwell, F. Marmolejo and R.J. Wood	157
Monad compositions I: general constructions and recursive distributive laws Ernie Manes and Philip Mulry	172
Quasi locally connected toposes Marta Bunge and Jonathon Funk	209

More morphisms between bundle gerbes Konrad Waldorf	240
Towards an n-category of cobordisms Eugenia Cheng and Nick Gurski	274
The theory of core algebras: its completeness Peter Freyd	303
Higher cospans and weak cubical categories (Cospans in algebraic topology, I) Marco Grandis	321
Coherent unit actions on regular operads and Hopf algebras Kurusch Ebrahimi-Fard and Li Guo	348
Dense morphisms of monads Panagis Karazeris and Jiri Velebil	372
Enriched model categories and an application to additive endomorphism spectra Daniel Dugger and Brooke Shipley	400
Nuclei of categories with tensor products Alexei Davydov	440
Exploring the gap between linear and classical logic Francois Lamarche	473
On the axiomatisation of Boolean categories with and without medial Lutz Strassburger	536
Collared cospans, cohomotopy and TQFT (cospans in algebraic topology, II) Marco Grandis	602
A universal property of the monoidal 2-category of cospans of ordinals and surjections M. Menni, N. Sabadini and R. F. C. Walters	631
Quotients of tannakian categories J.S. Milne	654
Familial 2-functors and parametric right adjoints Mark Weber	665

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods. Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication. The method of distribution of the journal is via the Internet tools WWW/ftp. The journal is archived electronically and in printed paper format.

SUBSCRIPTION INFORMATION. Individual subscribers receive (by e-mail) abstracts of articles as they are published. Full text of published articles is available in .dvi, Postscript and PDF. Details will be e-mailed to new subscribers. To subscribe, send e-mail to tac@mta.ca including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor.

INFORMATION FOR AUTHORS. The typesetting language of the journal is \TeX , and $\text{\LaTeX} 2_{\epsilon}$ is the preferred flavour. \TeX source of articles for publication should be submitted by e-mail directly to an appropriate Editor. They are listed below. Please obtain detailed information on submission format and style files from the journal's WWW server at <http://www.tac.mta.ca/tac/>. You may also write to tac@mta.ca to receive details by e-mail.

EDITORIAL BOARD.

Managing editor. Robert Rosebrugh, Mount Allison University: rrosebrugh@mta.ca

\TeX nical editor. Michael Barr, McGill University: barr@math.mcgill.ca

Transmitting editors.

Richard Blute, Université d' Ottawa: rblute@uottawa.ca

Lawrence Breen, Université de Paris 13: breen@math.univ-paris13.fr
